

# LDO03C SERIES

## Single Output

3 A current rating

Input voltage range 3-13.8 V

Adjustable output voltage 0.59-5.1 V

- Optional 3-pin model factory set
- Optional 5-pin model factory set with power good option

Excellent transient response

Power enable (5-pin model)

Minimum airflow

Small package

Termination voltage capacity

RoHS Compliant

The LDO03C is a new high density, open frame, non-isolated converter for space sensitive applications. This model has a wide input range of 3-13.8 V and offers a 0.59-5.1 V adjustable output with 3 A capability. Typical efficiency for this model is 90% (5 Vin, 2.5 Vout, 3 A load). The 5-pin version of this voltage device offers the additional features of enable, and with a default wide adjustable output voltage range or option of power good.
