

PROCESS CONTROL FOR GLASS MANUFACTURING

PLASMA POWER DELIVERY, TEMPERATURE MEASUREMENT, AND
TEMPERATURE CONTROL

Improve Glass Process Control and Efficiency

Glass Production

Precise temperature monitoring and control enable efficient melting, glass viscosity control, heat zone adjustment, annealing, and stress reduction. It also helps improve glass quality and prolongs the life of critical assets such as refractory walls. For decades, our instruments have provided robust, reliable performance in continuous and batch glass manufacturing processes.

TEMPERATURE MEASUREMENT SOLUTIONS

- Robust and non-contact
- High-quality infrared data
- Integration with production controls
- Custom software and support

Pyrometers

Thermal Imagers

POWER CONTROL SOLUTIONS

- Flexible voltages and loads
- Digital and analog I/O options
- Custom software and support

Thyro Family

Regenerator

Melting Tank

Tin Bath

Annealing Lehr

Glass Coating

New coating materials and layer stacks require highly developed plasma power delivery controls. Advanced Energy's DC, pulsed DC, bipolar pulsed DC, and RF solutions provide stable, reliable, precise power to increase uptime, deposition rates, and film quality.

ASCENT® AMS II

- Water cooling
- Expanded operating range
- Wide mains voltage range
- Embedded PowerInsight by Advanced Energy™ IoT intelligence

ASCENT AMS II / ASCENT DMS
ASCENT DMS AP

Dual-Magnetron Sputtering

ASCENT AP

- Numerous customizable power delivery parameters
- Advanced pulse shaping
- Compact, single-unit solution (up to 30 kW)
- Proactive, progressive arc management
- Power, voltage, or current regulation

ASCENT AMS II
ASCENT SMS AP

Single-Magnetron
or pDC Sputtering

Industrial Glass Coater

ABOUT ADVANCED ENERGY

Advanced Energy (AE) has devoted more than four decades to perfecting power for its global customers. AE designs and manufactures highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

AE's power solutions enable customer innovation in complex semiconductor and industrial thin film plasma manufacturing processes, demanding high and low voltage applications, and temperature-critical thermal processes.

With deep applications know-how and responsive service and support across the globe, AE builds collaborative partnerships to meet rapid technological developments, propel growth for its customers and power the future of technology.

PRECISION | POWER | PERFORMANCE | TRUST
